Overview

High-Efficiency Cyclonic Cleaning

This bagless canister vacuum cleaner utilizes advanced cyclone technology to effectively separate dirt and debris from the airflow, ensuring consistent suction power without clogging. Its compact, maneuverable design features smooth-rolling wheels and an ergonomic handle, making it easy to navigate around furniture and across various floor surfaces. Built for durability and convenience, it includes a transparent dustbin for easy monitoring and a HEPA filtration system to improve indoor air quality.

Performance

Filtration System	Cyclonic filtration with HEPA filter
Suction Control	Yes
