Overview

Efficient Cleaning Performance

The MD-1301 is a compact and powerful bagless cylinder vacuum cleaner designed for versatile household cleaning. It features an advanced multi-stage centrifugal separation system and high-speed whirlwind filtration to effectively capture fine dust and allergens. With its durable construction, ergonomic handle, and variable suction controls, this vacuum offers a practical and comfortable cleaning solution for various floor types.

Technical Features

Key Operational Benefits

- Low noise operation
- No material wear design
- Variable suction control (MIN/MAX)
- Transparent dust container

Filtration Technology

Multi-stage centrifugal separation, High-speed whirlwind filtration

Design & Usability

Usability Features

Compact Design • Durable Handle • Smooth-rolling Wheels • Easy-empty Container
