

Bagless Cylinder Vacuum Cleaner

This bagless cylinder vacuum cleaner is designed with a transparent dust container, making it easy to monitor fill levels. Its two-wheel design ensures smooth movement across different surfaces.

Product Overview

High-Efficiency Cylinder Vacuum

This bagless cylinder vacuum cleaner is engineered for effective debris collection in professional and commercial environments. Featuring a high-powered 1400W motor, it ensures consistent suction performance across various floor surfaces. The design includes a transparent container for easy monitoring and a mobile two-wheel chassis for seamless maneuverability.

Technical Specifications

Maximum Power

1400 W

Motor Power

Filtration Type	Bagless
-----------------	---------

Design & Features

Dust Container	Transparent with MAX fill indicator
Controls	Top-mounted rotary dial
Mobility	Two-wheel cylinder system
