

Bagless Upright Vacuum Cleaner with Hand-held Unit

This bagless upright vacuum cleaner features a detachable handheld unit. It is equipped with a transparent dust container and a telescopic handle.

Product Overview

Versatile Cleaning Performance

This bagless upright vacuum cleaner offers a flexible dual-use design, featuring an integrated detachable handheld unit for convenience. Its cyclonic filtration system ensures efficient debris collection, which is easily monitored through the transparent dust container. Designed for user comfort, the upright unit is equipped with a telescopic handle to provide adjustable height and improved maneuverability across various floor surfaces.
