Product Overview

Professional Lighting Solutions

These versatile lamp holders are engineered for secure and reliable electrical connections across a wide range of lighting applications. Constructed from durable, heat-resistant materials like bakelite, these components ensure long-term safety and performance in both residential and commercial environments. The collection includes various mounting styles and adapters, providing flexibility for diverse electrical installation requirements.

Material & Construction

Key Features

Heat Resistant • Durable Construction • Insulated Body

Available Materials

Bakelite, PP, ABS, PC

Application & Compatibility

Mounting Options

- Vertical Mount
- Angled Mount
- Compact Design

Supported Base Types

E27, E14
