

Bale Clamp for Material Handling

This bale clamp is designed for efficient and damage-free handling of various bale types, such as cotton, hay, and waste paper. It features a robust steel frame, hydraulically operated clamping arms with adjustable pressure, and optimized arm profiles for secure gripping.

Overview

Heavy-Duty Bale Handling

This heavy-duty bale clamp is engineered for the efficient and damage-free handling of various bale types, including cotton, hay, and waste paper. It features a robust steel frame construction and hydraulically operated arms with adjustable pressure settings to ensure secure gripping while minimizing bale distortion. Designed for seamless integration, the unit allows for quick mounting on standard forklifts and material handling equipment, ensuring reliable performance in demanding industrial environments.

Technical Specifications

| | |
|-----------------------|--------------------------|
| Construction Material | Robust steel frame |
| Operation Mechanism | Hydraulically operated |
| Compatible Materials | Cotton, Hay, Waste Paper |

Features & Safety

Safety Features

- Accidental release prevention
- Operator safety design
- Adjustable clamping pressure

Equipment Compatibility

Forklifts • Material Handling Equipment
