

Ball Peen Hammer with Hardened Steel Head

This ball peen hammer is a versatile hand tool for shaping metal, riveting, and striking punches and chisels. It features a hardened steel head with a spherical peen for rounded shaping and a flat face for general hammering.

Product Overview

Versatile Industrial Hammer

The F01 ball peen hammer is a professional-grade hand tool engineered for precision tasks including metal shaping, riveting, and striking punches or chisels. Featuring a robust, hardened steel head, it offers dual-functionality with a spherical peen for rounded shaping and a flat face for general hammering needs. Designed for durability and comfort, this tool is an essential addition for automotive repair, metalworking, and heavy-duty industrial applications.

Technical Specifications

Head Features

- Spherical peen for rounded shaping
- Flat face for general striking

Head Material	Hardened Steel
Primary Applications	Metalworking, Automotive Repair, Industrial Maintenance, Riveting
