

Ball Pein Hammer with Double Plastic-Coated Handle

This ball pein hammer features a forged steel head, ensuring strength and durability for demanding tasks. Its double plastic-coated handle is ergonomically designed to provide a comfortable and secure grip, reducing user fatigue.

Product Overview

Professional Grade Ball Pein Hammer

This ball pein hammer features a high-quality forged steel head designed for maximum strength and durability in demanding work environments. The handle is equipped with a double plastic coating, ensuring an ergonomic and secure grip that minimizes user fatigue during extended periods of operation. It is a reliable tool suitable for metal shaping, riveting, and striking tasks such as driving punches and chisels.

Technical Specifications

Primary Applications

- Metal shaping
- Riveting
- Striking punches
- Striking chisels

Head Material	Forged Steel
Handle Construction	Double Plastic-Coated

Features

Key Benefits	Ergonomic Design, Durable Construction, Fatigue Reduction, Secure Grip
