

Ball Spline for SMT Equipment

This ball spline is designed for use in SMT pick-and-place machines. It facilitates smooth linear motion and accurate positioning.

Product Overview

Precision Ball Spline for SMT Systems

This high-precision ball spline is engineered specifically for use in professional SMT assembly equipment. Designed to facilitate smooth linear motion and exact positioning, it plays a critical role in maintaining machine accuracy during high-speed production cycles. Built from durable materials, this component is ideal for demanding industrial environments where consistent performance is essential for long-term operational efficiency.

Compatibility

Supported Machine Series	YS12, YG12, YV100II, YV100X, YG200, YG100

Component Details

Condition
Original • New

Primary Part Number	KHY-M7106-00
---------------------	--------------

System Assemblies

Associated System Assemblies

Component Category	Reference Part Numbers
System Unit Assy	KM5-M4200-01X, KM5-M4200-02X, KM5-M4200-03X
Servo Board Assy	KM5-M5840-020, KM5-M5840-02X, KM5-M5840-03X, KM5-M5840-04X
I/O Head Assy	KV8-M4570-000, KM1-M4570-001, KV8-M4572-012
Vision Board Assy	KM5-M441H-021, KM5-M441H-02X, KGJ-M441H-030
Connection Board Assy	KV7-M4550-110, KGA-M4550-100
I/O Conveyor Unit	KM5-M4580-011, KM5-M4582-101, KGT-M4580-012
