

Bar Tacking Machine for Clothing Reinforcement

This bar tacking machine reinforces various parts of clothing. It is available in different models, including GD2303-21, GD2303-28, and GD2303-42.

Overview

Professional Bar Tacking Solution

The GD2303 series bar tacking machine is engineered for high-precision reinforcement sewing on various apparel components. Designed to enhance the durability of garments, this series offers specialized models to accommodate different sewing requirements and material thicknesses. Its robust construction ensures reliable performance in demanding production environments.

Performance Metrics

Maximum Sewing Speed

2300 s.p.m

Operating Speed

Technical Specifications

Model Specifications

Model	Tacking Range (mm)	Needle Size
GD2303-21	4-8	21
GD2303-28	1.5-3	DPx5 #14-18
GD2303-42	8-16	42

Application

Ideal Applications

Garment Reinforcement, Bar Tacking, Apparel Manufacturing, Industrial Sewing
