

Barcelona Metro Line 2 Trainset

This is a metro trainset operating on Barcelona's Line 2. The Serie 9000 train was introduced in 2006.

Overview

High-Capacity Urban Rail Solution

This Metropolis metro trainset, specifically the Serie 9000 model, represents a specialized rail transit solution designed for high-density urban environments. Originally deployed on Barcelona's Line 2 in 2006, this unit focuses on operational efficiency and passenger throughput. It serves as a robust example of modern rail engineering tailored for demanding metro transit networks.
