

Bathroom Ceiling Fixture with Heat, Light, and Ventilation

This ceiling-mounted bathroom fixture combines ventilation, lighting, and heating functionalities. It features heat lamps arranged around a central light, set within a metallic-finished square housing, with a ventilation duct indicating its exhaust function.

Product Overview

Comprehensive Bathroom Comfort System

This high-performance bathroom ceiling fixture provides an all-in-one solution for climate and lighting management. Combining rapid heating capabilities with effective ventilation and integrated illumination, it ensures a comfortable and dry environment. The unit features a sleek metallic housing designed for efficient installation in modern residential or commercial restrooms.
