Product Overview

Reliable Whirlpool Circulation

The BTP series is a high-performance, single-stage plastic bathtub pump engineered for quiet and efficient water circulation. Designed with durable, high-quality materials like glass-loaded polypropylene and stainless steel, it ensures consistent performance for both residential and commercial whirlpool systems. This pump features a compact, robust construction that allows for easy installation and reliable, continuous operation.

Technical Specifications

Available Models

- BTP-2200A/B
- BTP-3000A/B
- BTP-4000A/B

Motor Characteristics

Asynchronous, Two Poles, IP55 Protection, Class F Insulation, Continuous Operation, Built-in Thermal Protector

Material Composition

Construction Materials

| Component | Material |
|-----------------------------|----------------------------|
| Pump Body, Feet, & Diffuser | Glass loaded polypropylene |
| Impeller | PPO |
| Motor Shaft | Stainless steel AISI 420 |
| Motor Housing | Aluminum L-2521 |
