

# Battery Connection Kit with Jumper Cables and Fuse Holder

This kit provides reliable electrical connections for automotive batteries. It includes jumper cables, color-coded clamps, and a fuse holder.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Battery Connection Solution

This comprehensive battery connection kit is engineered for reliable, high-current electrical power transfer. Designed to support jump-starting, battery charging, and various high-power applications, the kit includes heavy-duty insulated cables and secure, color-coded clamps for safe operation. With the addition of an integrated inline fuse holder, this solution ensures both efficient performance and essential circuit protection for automotive and marine environments.

## Technical Specifications

Fuse Holder Wire Gauge	12 AWG
Fuse Compatibility	Standard blade fuses

## Features

### Key Features

- Color-coded clamps for positive and negative terminals
- Heavy-duty insulated cable construction
- Secure connector for easy assembly and disassembly
- Flexible cable design for cold weather handling
- Insulated grips for enhanced safety

## Applications

Suitable Applications	Automotive, Marine, Jump-starting, Battery Charging, Low-voltage circuits
