

Battery Jumper Cable Clamps

Heavy-duty battery clamps designed for connecting jumper cables to car batteries. Features include color-coded handles (red and black) for polarity identification and a strong spring mechanism for secure grip.

Product Overview

Heavy-Duty Battery Jumper Clamps

These professional-grade battery jumper cable clamps are engineered for reliability in demanding automotive environments. Featuring a high-tension spring mechanism, they ensure a secure and consistent connection to car battery terminals. With distinct color-coded handles for red and black polarity identification, these clamps are an essential tool for roadside assistance and routine battery maintenance.

Design and Build

Polarity Identification

- Red Handle (Positive)
- Black Handle (Negative)

Key Features

Heavy-Duty, Color-Coded, High-Tension Spring, Automotive Grade

Application

Recommended Use Cases

- Emergency Roadside Assistance
- Battery Maintenance
- Jump Starting Vehicles
