

Battery Powered Flexible LED Strip Light

This flexible LED strip light is powered by a battery pack. It features red, green, and blue LEDs for a variety of lighting effects and includes an adhesive backing for easy installation.

Product Overview

Flexible Battery-Powered Lighting

This flexible LED strip light is designed for versatile indoor decorative and accent lighting applications. Powered by a convenient 3xAA battery box, it offers a portable solution for areas where traditional wired power is unavailable. The strip features energy-efficient 2835 SMD LEDs, providing a reliable and long-lasting illumination option for various creative projects.
