Battery Powered Flexible LED Strip Light

Flexible LED strip light is powered by a battery pack. It features closely spaced LEDs on a flexible circuit board with adhesive backing.

Product Overview

Flexible Battery-Powered Lighting

This flexible LED strip light provides a versatile and portable lighting solution for various decorative and accent applications. Powered by a standard AA battery pack, it offers easy installation on almost any surface thanks to its adhesive backing. The design includes a compact battery box, making it an ideal choice for backlighting or temporary lighting setups where mains power is unavailable.

Technical Specifications

LED Density

30 pcs/m
LEDs per Meter

Total Length	1 m
Total LED Count	90 pcs
LED Type	2835 SMD

Power & Connectivity

Power Source	3 x AA Batteries
Lead Wire Length	30 cm

Features

Key Features	Flexible, Battery Operated, Adhesive Backing, Portable
