Overview

Efficient Material Handling Solution

The QTP200E is a high-performance, battery-powered material handling truck designed to significantly reduce physical strain while increasing operational productivity. Featuring a robust steel frame and pneumatic tires, it ensures stability and smooth maneuverability across various surfaces in warehouses, factories, and distribution centers. With an intuitive ergonomic handle and extended battery runtime, this unit simplifies the transportation of heavy loads up to 300kg.

Technical Specifications

| | |
|----------------|-----------|
| Load Capacity | 300 kg |
| Motor Power | 500 w |
| Battery System | 24v, 20Ah |
| Forward Speed | 6 km/h |
| Working Time | 8 h |

Physical Dimensions

| | |
|---------------------|------------------|
| Unit Weight | 40 kg |
| Dimensions (LxWxH) | 165 x 60 x 45 cm |
| Wheel Specification | 13x3.00-8 |

Features

| | |
|--------------|---|
| Key Features | Battery Powered, Pneumatic Tires, Ergonomic Handle, Emergency Stop, Low-Battery Indicator |
