Product Overview

Professional Battery-Powered Strapping

This battery-powered plastic strapping tool is designed for efficient and reliable strapping of packages and pallets. It features adjustable tension settings to accommodate various strapping needs, ensuring secure and consistent results every time. With an ergonomic design and lightweight construction, it minimizes operator fatigue, making it an ideal solution for high-volume strapping applications in warehousing and logistics.

Technical Specifications

Key Features

- Strong pulling force
- Fast welding speed
- No buckle packing required
- Adjustable tension settings
- Automatic cutting function

Compatible Strap Materials

PP, PET

Power & Performance

Power System

2 pcs

Included Batteries

Battery Performance

Large Capacity • Extended Working Time • Portable Operation
