

Battery Powered Vacuum Pump for HVAC&R

This vacuum pump is designed for efficient and reliable operation with low noise. It is suitable for refrigeration, medicine, chemical, election, and metallurgy industries.

Product Overview

Professional Cordless Vacuum Solution

This battery-powered vacuum pump is designed for high efficiency and reliability in demanding HVAC&R environments. Its cordless design provides maximum mobility for technicians on job sites, while the robust construction ensures consistent performance across various operating conditions. Suitable for diverse applications including refrigeration and chemical industries, this pump combines portable convenience with high-performance vacuum generation.

Technical Specifications

Battery Power

12 V

Voltage

3.2 Ah

Capacity

Suitable Industries

HVAC&R, Refrigeration, Medicine, Chemical, Metallurgy

Operational Features

Operational Highlights

- Cordless operation for high mobility
- Low noise emission during operation
- Compact and lightweight portable design
- Durable construction for professional use

Maintenance

Safety Notice

Do not operate without oil
