

Bead Wrapping Machine

The Bead Wrapping Machine is designed for wrapping beads with precision. This rubber processing machine handles various bead sizes and materials, featuring adjustable tension controls and a user-friendly interface.

Overview

Precision Bead Wrapping Solution

This specialized machine is designed for wrapping tyre steel wire circles with triangle strips and outer wrapping cloth. Engineered for industrial environments, it features a robust, mechanically driven wrapping mechanism that ensures precision and efficiency. The unit includes adjustable tension controls and a user-friendly interface, supported by a foot pedal for operator control and integrated safety features for reliable performance.

Technical Specifications

Control Features

- Foot pedal operation
- Control box with indicators
- Adjustment levers for fine-tuning

Safety Compliance

Integrated Safety Features • Industrial Grade

Primary Function

Wrapping tyre steel wire circles with triangle strip and outer wrapping cloth
