

Beam Pumping Unit

This is a beam pumping unit designed for oil extraction. It provides a reliable method for lifting crude oil.

Product Overview

High-Quality Beam Pumping Unit

This Beam Pumping Unit is designed to meet high quality standards for industrial applications. It provides a reliable solution for extraction operations, ensuring consistent performance in demanding environments. The unit is built with durability in mind to support long-term operational efficiency.

Quality Grade

Good Quality

Technical Features

Filtration System

- Multi-layer filter system
- Efficient grease capture
- Designed for easy cleaning and maintenance

Ventilation System

Powerful ventilation system designed to remove smoke, grease, and cooking odors

Design & Ergonomics

Control Interface

- Easy-to-use controls
- Adjustable fan speeds
- Adjustable light intensity

Material

Modern stainless steel

Integrated Lighting

Yes

Design Style

Sleek, Contemporary, Functional
