

Bean-to-Cup Coffee Maker with Stainless Steel Carafe

This bean-to-cup coffee maker grinds whole coffee beans and brews directly into a stainless steel carafe. It features multiple brewing options and adjustable settings for coffee strength and cup size.

Product Overview

Premium Bean-to-Cup Brewing

The HGB-4 is a sophisticated bean-to-cup coffee maker engineered for high-quality home brewing. It features an integrated grinder that processes whole beans directly before brewing into a double-walled stainless steel carafe for maximum freshness. With adjustable settings for strength and volume, this compact unit offers a customizable coffee experience through an intuitive, illuminated interface.
