

Bearing Assembly with F Seal

This is a bearing assembly designed for specialized applications. It features an F seal to provide enhanced protection and optimal performance.

Overview

Bearing Assembly with F Seal

This high-precision bearing assembly is engineered for reliable performance in demanding industrial applications. It features an integrated F-seal design, which provides enhanced protection against contaminants, ensuring extended service life and reduced maintenance requirements. The assembly is built to rigorous dimensional standards, making it a dependable choice for machinery requiring precise rotational support.

Technical Specifications

Dimensional Reference

- d (Inner Diameter)
- D (Outer Diameter)
- B (Width)
- B1
- d1
- C
- h
- S
- S1
- 2-ds (Mounting Holes)

Design Features

F Seal Technology, Precision Engineered, Contaminant Resistant, Standardized Dimensions
