Product Overview

High-Performance Abrasive Belts

These abrasive belts are engineered for efficient material removal and high-quality surface finishing across a variety of substrates. Constructed with durable abrasive grains bonded to a robust, flexible backing, they are designed to resist tearing and provide long-lasting performance. They are suitable for professional applications including woodworking, metalworking, and polishing plastics.

Technical Specifications

Process Capabilities

Grinding • Sanding • Polishing • Material Removal • Fine Finishing

Construction Details

- Durable abrasive grains
- Flexible backing material
- Tear-resistant design
- Consistent finishing results

Suitable Materials

Wood, Metal, Plastics
