

Bench Drill Press

A bench drill press is designed for mounting on a workbench or table. It is used for drilling holes in materials like wood, metal, and plastic.

Product Overview

Versatile Bench Drill Press

This bench drill press is a compact and efficient solution designed for precision drilling tasks on a variety of materials including wood, metal, and plastic. Its space-saving design makes it an ideal choice for workshops where floor space is limited. Featuring an adjustable table and variable speed settings, it provides the flexibility needed for diverse machining requirements.

Technical Specifications

Compatible Materials

Wood • Metal • Plastic

Available Model Series

DAF-16, DAF-25, ZX7016, ZX7032

Design Features

Key Features

- Compact bench-top mounting
- Adjustable drill table height
- Variable speed motor control
- Column-mounted drill head
