

Bench Drilling Machine

This industrial-grade bench drilling machine is designed for precision drilling in metalworking applications. It features a robust construction for stability and durability, ensuring accurate and consistent performance.

Product Overview

Industrial Bench Drilling Machine

This bench drilling machine is engineered for high-precision operations, making it an ideal choice for instrument and camera manufacturing sectors. Constructed with high-quality cast iron for the spindle head, column, and base, it offers exceptional durability and stability. Designed to meet the rigorous demands of professional workshops, this machine ensures consistent and accurate performance across various metalworking tasks.

Construction & Materials

Build Quality

Industrial Grade • High Precision

Material Composition

Cast Iron Base, Cast Iron Column, Cast Iron Spindle Head

Performance Features

Suitable Applications

- Instrument manufacturing
- Camera component production
- Professional metalworking workshops
- Industrial environments
