

Bench Grinder

The bench grinder is a stationary power tool used for grinding, polishing, and sharpening. It features two abrasive wheels rotating at high speed, suitable for shaping metal, removing rust, and sharpening tools.

Overview

Professional Bench Grinder

This stationary bench grinder is an essential power tool designed for precision grinding, polishing, and sharpening tasks. Featuring two high-speed abrasive wheels, it is perfectly suited for shaping metal components, removing rust, and maintaining sharp edges on workshop tools. Built with safety and usability in mind, the unit includes adjustable tool rests and protective safety shields to ensure a secure operating environment for both professional workshops and serious DIY projects.
