

Bench Grinder for Medical Tool Sharpening

This bench grinder is designed for sharpening tools and shaping materials in pharmaceutical and medical applications. It features a robust motor and durable construction for continuous operation.

Product Overview

Precision Sharpening for Medical Applications

This bench grinder is specifically engineered for the rigorous demands of sharpening tools and shaping materials within pharmaceutical and medical environments. Featuring a robust motor designed for continuous operation, the unit ensures consistent performance and reliability. It comes fully equipped with essential safety features, including adjustable tool rests, spark deflectors, and integrated eye protection shields to ensure operator safety during precision tasks.

Technical Specifications

Grinding Wheels	2 units
Operational Mode	Continuous operation

Safety & Compliance

Safety Features	Safety Shields, Spark Deflectors, Eye Protection, Adjustable Tool Rests
-----------------	---

Design & Construction

Construction	Durable, industrial-grade build
--------------	---------------------------------

Application

Primary Application

- Tool sharpening
- Material shaping
- Pharmaceutical equipment maintenance
- Medical instrument preparation
