

Bench Grinder with Abrasive Wheels

A bench grinder is a stationary power tool used for grinding, polishing, or buffing materials. It features two abrasive wheels mounted on a motor-driven spindle, with adjustable tool rests for precise workpiece positioning.

Product Overview

Professional Bench Grinder

This bench grinder is a reliable stationary power tool designed for essential workshop tasks including grinding, sharpening, and buffing. It features dual abrasive wheels driven by a robust motor to ensure efficient metal shaping and rust removal. Equipped with adjustable tool rests, this unit allows for precise workpiece positioning, making it an indispensable asset for fabrication facilities and maintenance shops.
