

Bench Grinder with Abrasive Wheels

This bench grinder is a stationary power tool used for grinding, polishing, and sharpening various materials. It features two abrasive wheels mounted on a rotating shaft, powered by an electric motor.

Product Overview

Professional Bench Grinder

This stationary power tool is engineered for heavy-duty grinding, polishing, and sharpening tasks. Equipped with an electric motor and dual abrasive wheels of varying grits, it provides both coarse material removal and fine finishing capabilities. Designed for stability and safety, the unit features a robust base, adjustable tool rests, and integrated safety guards, making it an essential asset for metal shaping and blade maintenance.

Technical Specifications

Tool Type	Stationary Bench Grinder
Power Source	Electric Motor
Wheel Configuration	Dual Abrasive Wheels

Features

Safety & Control	Safety Guards, Adjustable Tool Rests, Sturdy Base
