

Bench Grinder with Integrated Work Light

This bench grinder is equipped with grinding wheels on either side of a central motor. It features safety shields, adjustable tool rests, and an integrated work light.

Overview

Professional Bench Grinder

This bench grinder is designed for precision and durability in professional workshop environments. It features a robust central motor housing flanked by dual grinding wheels, making it suitable for a variety of sharpening and material removal tasks. Equipped with integrated safety shields, adjustable tool rests, and a built-in work light, this unit prioritizes both operator safety and visibility for high-quality results.
