

## Bench Vise with Swivel Base

This bench vise is designed for secure clamping and holding of workpieces. It features a robust construction with a swivel base for versatile positioning.

### Product Overview

#### Heavy-Duty Performance

This active bench vise is engineered for demanding industrial and workshop environments. It features a robust construction designed for the secure clamping and holding of various workpieces. With an integrated swivel base, it offers versatile positioning for precise metalworking, woodworking, and general-purpose applications, ensuring reliable performance and long-term durability.

### Key Features

#### Core Capabilities

- Heavy-duty construction
- Swivel base for versatile positioning
- Secure workpiece clamping
- Suitable for metalworking and woodworking

### Applications

#### Best Used For

Metalworking, Woodworking, General Maintenance, Industrial Workshop
