

Benchtop Drill Press

This drill press is a robust and versatile tool designed for precision drilling in a variety of materials. Featuring a powerful motor, it delivers consistent performance and ample torque for demanding applications.

Overview

Professional Benchtop Drill Press

The ZJ4116H is a robust and versatile benchtop drill press designed for precision drilling across a variety of materials. It features a powerful motor that delivers consistent torque and performance, making it suitable for both professional workshops and demanding DIY applications. With its adjustable worktable and variable speed control, users can achieve optimal results tailored to specific material types and bit sizes.

Performance

Key Performance Metrics

4116 H

Model Series

Speed Control

Variable speed control for optimal material-specific drilling

Key Features

Core Features

- Powerful motor for high torque
- Adjustable worktable for stable workpiece positioning
- Integrated depth stop for repeatable accuracy
- Sturdy construction for enhanced stability
- Versatile material compatibility

Construction

Build Quality

Robust Design • Durable Construction • High Stability

Applications

Suitable For

Professional Use, DIY Projects, Precision Drilling, Workshop Tasks
