Overview

Professional Benchtop Drill Press

This Benchtop Drill Press is engineered for precision drilling in metalworking and various other materials, featuring a robust cast aluminum table and a sturdy 70mm column for maximum stability. With a 5-speed range from 600 to 2600 RPM and a powerful motor, it provides the versatility needed for accurate, repeatable holes in professional and DIY environments. Safety is prioritized with an integrated chuck guard and emergency stop functionality, ensuring a reliable performance for every project.

Performance Metrics

Key Performance Indicators

630 W

Max Power (S2 15min)

16 mm

Chuck Capacity

50 mm

Spindle Travel

290 mm

Swing

Technical Specifications

Voltage	230 V / 50 Hz
Motor Speed	1450 /min
Speed Range	5 speeds (600 - 2600 RPM)
Spindle Taper	B16

Worktable & Base

Table Material Cast Aluminum	
Table Size	211 x 211 mm
Table Tilt Range	-45° to +45°
Base Dimensions	440 x 300 mm

Physical Dimensions

Column Diameter	70 mm
Total Machine Height	1440 mm

Features

Safety & Control	Chuck Guard, Emergency Stop, Depth Stop, Variable Speed Control
