

Benchtop Grinding Machine

This benchtop grinding machine is a powerful and versatile tool for grinding, sharpening, and polishing. It features a robust motor for reliable performance and adjustable tool rests for precise grinding angles.

Product Overview

Benchtop Grinding Machine

This benchtop grinding machine is a versatile tool engineered for tasks such as grinding, sharpening, and polishing a variety of materials. It features a robust motor designed for consistent, reliable performance in workshop environments. Equipped with safety essentials like a dust-protected switch, it offers a practical solution for precision metalworking and maintenance tasks.

Technical Specifications

Input Power

120 W Input Power (Low)	150 W Input Power (High)
-----------------------------------	------------------------------------

No-load Speed	2950 min ⁻¹
Wheel Size	125/150 x 16 x 12.7 mm

Electrical Requirements

Voltage & Frequency

Voltage	Frequency
230V	50Hz
120V	60Hz

Features

Safety Features	Dust protection switch
