Product Overview

Professional Benchtop Grinding Solution

This benchtop grinding machine is designed for fast and efficient sharpening of workshop tools, drills, and garden equipment. It features a robust construction suitable for general metal grinding and shaping tasks. With adjustable safety guards and stable mounting options, it provides a reliable solution for industrial and workshop environments.

Technical Specifications

Included Grinding Wheels	36 Grit, 60 Grit
Bearing Type	Permanently lubricated ball bearing

Safety & Operation

Safety Features

- Adjustable eye shields
- Spark guards
- Adjustable tool rests

Stability & Mounting

- Rubber feet for vibration dampening
- Base with mounting holes for bench security
