Overview

Benchtop Medical Laboratory Centrifuge

The L-450A is a versatile benchtop centrifuge designed for medical and research laboratories. It features a brushless motor for quiet, maintenance-free operation and an intuitive LED interface for precise control over speed and time. With automatic RCF calculation and multiple safety features, it provides reliable separation for various biochemical, serum, and plasma applications.

Performance & Capacity

Available Rotor Options

Rotor Model	Capacity	Max Speed	Max RCF
4501A	12 x 7ml	4500	2155
4502A	12 x 15ml	4000	1700
4503A	12 x 10ml	4000	1700
4504A	8 x 20ml	4000	1700

Maximum Speed 4500 r/min

Maximum RCF 2420 *g

Technical Specifications

Noise Level	50 dBA
Power Consumption	90 W
Dimensions	300 x 270 x 210 mm
Net Weight	7.5 kg
Voltage Compatibility	110V, 220V, 230V

Features & Safety

Safety Protections

Electronic Door Locks • Over Speed Protection • Imbalance Protection

Key Features

- Microcomputer control with DC brushless motor
- LED display for speed/RCF and time
- Automatic RCF calculation
- Programmable operation
- Durable ABS construction

Certifications

CE, ISO 9001
