

# Benchtop Tapping Machine

This benchtop tapping machine is designed for creating accurate and consistent threads. It features a powerful motor, variable speed control, and adjustable depth stop for consistent thread depths.

## Product Overview

### Benchtop Tapping Machine ZS-10

The ZS-10 is a precision benchtop tapping machine engineered for creating accurate and consistent threads. Designed for durability and stability in industrial environments, this model features a robust construction and a powerful motor to support reliable performance. It offers intuitive controls and an adjustable depth stop to ensure consistent thread depths across a variety of production and maintenance tasks.

## Technical Specifications

Max Tapping Diameter	10 mm
Spindle Travel	42 mm
Spindle Taper	B12
Motor Power	370 W

## Dimensions

Max distance spindle to table

**48 mm**

Min Distance

**290 mm**

Max Distance
