

Benchtop Thickness Planer for Woodworking

This thickness planer is a woodworking tool designed for accurately and efficiently planing wood to a consistent thickness. It features adjustable height settings for precise depth control, ensuring smooth and even surfaces on various types of wood.

Overview

Professional Benchtop Thickness Planer

This benchtop thickness planer provides reliable performance for woodworking tasks requiring precise, consistent board thickness. Engineered with a powerful 1800W motor, it efficiently processes lumber to create smooth, level surfaces. The unit is designed with professional-grade safety features, including a waterproof switch, making it a dependable choice for intensive workshop environments.

Technical Specifications

Key Performance Metrics

1800 W Input Power	8000 rpm No-load Speed	2.5 mm Max Cutting Depth
------------------------------	----------------------------------	------------------------------------

Electrical Requirements: 230V / 50Hz

Blade Diameter: 254 mm

Features

Safety and Build: Waterproof switch, Benchtop design

Logistics

Quantity per 20' Container: 280 pcs
