

Bent Box Wrench 12-Point

This box wrench is available in sizes from 10mm to 150mm. It is die forged and corrosion resistant with high hardness.

Overview

Professional Grade Bent Box Wrench

This high-quality drop forged single bent box wrench is engineered for tightening and loosening large bolts and nuts in demanding industrial environments. Featuring a versatile 12-point spline design, it allows for numerous fastener head uses and provides a secure grip for efficient torque application. The tool is finished in black for durability and meets rigorous DIN 3113 standards for professional performance.

Technical Standards

Compliance
