

Bent Head Pruner for Gardening

This pruner features a bent head design for precise cutting in gardening and landscaping. It is equipped with durable steel blades and ergonomic handles.

Product Overview

Professional Bent Head Pruner

This professional-grade pruner features a specialized bent head design, engineered for precision cutting in demanding gardening and landscaping environments. Built with a high-quality SK5 drop-forged blade that has undergone rigorous heat treatment, the tool ensures exceptional edge retention and long-lasting durability. The ergonomic PVC handle is designed to reduce hand fatigue during extended use, making it an efficient solution for precise branch trimming and shrub maintenance.

Technical Specifications

Blade Material	SK5 Steel
Process	Drop forged, heat treated
Handle Material	PVC

Key Features

Design Advantages	Bent Head Design, Ergonomic Grip, High Durability
