

Bent Nose External Snap Ring Pliers

These external snap ring pliers are designed for installing and removing external snap rings. The bent nose provides access to rings in hard-to-reach areas.

Product Overview

Professional Grade Snap Ring Pliers

These bent nose external snap ring pliers are engineered for precision and durability in demanding maintenance environments. Featuring a fine polished finish and robust Cr-v alloy steel construction, they are designed to withstand heavy-duty use while providing excellent corrosion resistance. The ergonomic dipped handle ensures a secure, comfortable grip, making them an essential tool for automotive, machinery, and equipment assembly tasks.
