

Besan Ladoo Sweet Making Machine

This machine is designed for producing Besan Ladoo, a traditional Indian sweet. It automates the process of creating these round confections made from gram flour, sugar, and ghee, often garnished with nuts.

Product Overview

Professional Sweet Making Solution

This specialized machinery is designed to streamline the production of Besan Ladoo, a traditional Indian sweet crafted from gram flour, sugar, and ghee. By automating the shaping and forming process, it ensures consistent round-shaped confections with the characteristic melt-in-your-mouth texture. Ideal for commercial kitchens and confectioneries, this equipment helps maintain high-volume output while preserving the traditional quality of these festive treats.

Technical Details

Product Type

Food Processing • Confectionery Equipment

Key Features

- Automated shaping mechanism
- Consistent size and weight control
- Food-grade material construction
- High-volume production efficiency

Primary Application

Besan Ladoo production
