

Bevel Gear Assembly for Tractors

This bevel gear assembly is designed for efficient power transmission in tractors. It is made from high-quality materials for durability and reliable performance.

Product Overview

High-Performance Bevel Gear Assembly

This precision-engineered bevel gear assembly is a critical drivetrain component designed for optimal power transmission in agricultural tractors. Constructed from high-quality alloy steel with specialized surface hardening, it offers superior durability and wear resistance under demanding field conditions. The assembly includes a perfectly matched ring and pinion set, ensuring smooth, quiet operation and reliable long-term performance.

Technical Specifications

Precision-engineered bevel gear assembly designed for seamless integration into tractor drivetrains.

Primary Equipment Compatibility

- M7040 Tractor

Part Number

3c051-42300

Material & Treatment

High-quality Alloy Steel, Surface Hardened, Helical Teeth, OEM Specification Compliant

Key Features

Operational Performance

1 Bevel

Drive Type

100 %

Reliability Rating
