

BF4L 913 Diesel Engine Camshaft

This is a camshaft designed for BF4L 913 diesel engines. It is an essential auto part that controls the timing of valve opening and closing.

Product Overview

Precision Engineered Camshaft

This diesel engine camshaft is a critical component designed specifically for the BF4L 913 engine series. It plays a vital role in regulating valve timing to ensure optimal engine performance and efficiency. Engineered for durability and reliability, this part is essential for maintaining the smooth operation of heavy-duty machinery and automotive engines.

Technical Specifications

OEM Part Numbers	04237179, 04231541
Engine Compatibility	BF4L 913

Applications

Supported Machinery

- Truck
- Forklift
- Tractor
- Excavator
- Skid steer
