

BGA Rework Station for Motherboard Repair

This BGA rework station is suitable for repairing laptop, desktop, and smartphone motherboards. It features three independently controlled temperature zones and a user-friendly interface for easy operation.

Overview

Professional BGA Rework Station

This BGA rework station is engineered for precision desoldering and soldering on complex motherboards, including those found in laptops, desktops, and smartphones. Featuring three independent temperature heating zones, it ensures accurate thermal profiles for delicate components like CPUs, VGAs, and chipset bridges. The system is designed with a user-friendly interface, making it an accessible and reliable solution for professional repair environments.

Technical Specifications

Supported Components

- CPU
- VGA
- Southbridge
- Northbridge
- STP CPU

Heating Zones

3 zones

Compatible Devices

Laptop Motherboards, Desktop Motherboards, Smartphone Motherboards

Features

Key Attributes

Independent Heating Zones • User-Friendly Interface • Precise Temperature Control • Reballing Capable
