

BH175A Diesel Engine

The BH175A diesel engine is a reliable power source for industrial applications. It features direct fuel injection, a forced lubrication system, and a cooling system for optimal performance and longevity.

Overview

Robust Industrial Power Source

The BH175A diesel engine is a robust and reliable power source engineered for demanding industrial applications. It features direct fuel injection for efficient combustion, a forced lubrication system to extend engine service life, and an advanced cooling system for optimal temperature control. Designed for versatility, this engine is ideal for integration into generators, water pumps, and other heavy-duty machinery.

Performance & Features

Technical Highlights

- Direct fuel injection system
- Forced lubrication system
- Advanced thermal cooling system
- High serviceability design
- Low maintenance requirements

Applications

Suitable Applications

Generators, Water pumps, Heavy-duty machinery

Maintenance

Serviceability

Minimal downtime • Ease of maintenance • Maximized productivity
