

Bi-Metal Hole Saw Set

This bi-metal hole saw set is designed for cutting clean and accurate holes in various materials. It features durable bi-metal construction with hardened high-speed steel teeth for efficient cutting and long life.

Overview

Professional Bi-Metal Hole Saw Solutions

This bi-metal hole saw set is engineered for durability and precision, featuring sharp teeth designed for smooth cuts and efficient chip clearance. The rugged construction ensures long-lasting performance across a wide variety of materials including metal, aluminum, and wood. With a comprehensive size range and integrated slots for easy plug removal, it is an essential tool for electrical, plumbing, and general construction tasks.

Performance Features

Cutting Performance

- Sharp teeth for smoother cuts
- Positive rake teeth for better chip clearance
- Easy plug removal design
- Long lasting rugged durability

Technical Specifications

Diameter Range

13 mm Minimum Diameter	230 mm Maximum Diameter
----------------------------------	-----------------------------------

Material Compatibility

Suitable Materials

Metal, Aluminum, Drywall, Plastics, Wood

Construction

Build Material

Bi-metal construction with hardened high-speed steel teeth

Applications

Primary Applications

Electrical • Plumbing • General Construction • DIY
