

Bias Off-the-Road Port Tire

This bias OTR tire is engineered for extended wear and reliable performance in demanding port applications. Its deep tread design provides exceptional traction and contributes to long wear.

Overview

High-Performance Port Tire

The TL530 is a heavy-duty bias off-the-road tire specifically engineered for the demanding environments of port operations. It features a robust construction designed to resist impacts and cuts while providing a smooth ride and extended service life. This tire is an ideal solution for loaders and industrial vehicles requiring reliable traction and durability in challenging terrains.

Design Features

TL530

Port Tire with Longer Wear

- Solid centerline section for longer wear and smooth ride
- Deep tread for long wear and improved traction
- Extra cap gum volume offers longer working hours
- Tough construction for enhanced impact and cut resistance support

The TL530 features a solid centerline and deep tread design for maximum durability in port environments.

Tread & Construction Features

- Solid centerline section for longer wear and smooth ride
- Deep tread pattern for improved traction and longevity
- Extra cap gum volume to extend total working hours
- Tough construction for enhanced impact and cut resistance

Technical Specifications

Tire Type

Bias • Off-the-Road (OTR) • Port Tire • Heavy-Duty

Tire Size

16.00R25

Applications

Suitable Machinery	Port Equipment, Loaders, Construction Equipment, Industrial Vehicles
Operating Environment	Challenging terrains and demanding port operations
